

EVOCARDIO

Renegade Air Ski ASKI150

FULL BODY WORKOUT

The Renegade Air Ski ASKI150 strengthens the upper body, abdominal, back and leg muscles that are relevant to skiing. As the fitness machine works with an air and magnetic resistance system, the movements are very fluid. This makes training more fun and reduces the risk of injury.

The Air Ski ASKI150 is a very sturdy training machine. This unit relies on a very strong, elastic rope system, requiring only 8 kg to move from bottom to top. The ASKI150 can be fixed to the wall with mounting brackets wherever you want.

Training on the Air Ski ASKI150 can be done kneeling or sitting in front of the machine. This makes the machine ideal for athletes with physical limitations. You control the training resistance yourself: pulling harder accelerates the flywheel and increases the resistance. The different resistance levels (1-14) make it possible to simulate practical training in all conditions.

The robust carriage system with 3 different height positions and a swivel function, Nordic skiing is no longer the only exercise. To adjust the height, lift the ASKI150 slightly to remove the lock pin and place it at the desired height. The 4 mm thick steel mounting bracket allows you to place the ASKI150 in the desired position against the wall.

This unit has several training programs, allowing you to train in a varied and targeted way. The "quick release" handle allows you to quickly switch between different training programs. In addition, the large blue backlit LCD screen is easier to read during training.

The Renegade Air Ski ASKI150 is self-generating so there is no need for electrical cables.

TECHNICAL SPECIFICATIONS

Double robust 6203 sealed cartridge bearing set in the central hub of on the super steel fan for effortless rotation.

High performance internal drive mechanism with robust sealed cartridge unidirectional bearings to provide the best performance for both bipolar and conventional (alternating arm) technology. Minimal maintenance required.

Low maintenance, endless Poly-V double ribbed belt transmission.

Lightweight, high-strength drive cords for a smooth workout and a long life span.

Self-levelling pulley system with robust sealed cartridge bearings and a width between 62 cm (max.) and 26 cm (min.).

4 mm thick steel mounting brackets, holder with fixing bolts & washers for various workouts

CONSOLE

Screen	Large back-lighted LCD Screen display 8 workout modes including 20/10, 20/30 custom intervals, 4 target settings and heart rate control.
Feedback	Time, stroke/min., stroke, distance, calories, time/500m, watts, intensity setting & pulse
Heart rate monitoring	Built-In Polar wireless heart rate receiver to monitor your heart rate precisely.
Power supply	Console powered by AA LR6 / 1.5V battery (4 pcs)

DIMENSIONS

Product in use	D 38 x W 62 x H 208 cm
Carton	1: L 70 x W 58 x H 31 cm / 2: L 119 x W 40 x H 17 cm
Net/Gross weight	61 kg / 72 kg
Max. user weight	150 kg
